

Conservation Services, Inc.

Conservation Services, Inc. (CSI) is a regional facility that provides safe and convenient disposal services for communities, businesses and industries serving Adams County and surrounding areas. This facility is engineered with environmental protection systems that meet or exceed rigorous government regulations and are subject to highly regulated monitoring and reporting requirements. Systems include engineered liners and covers, and leachate collection and removal.

Containment Design

CSI disposal cells have been designed with a composite liner system consisting of a low-permeability soil liner overlain by a high-density polyethylene (HDPE) membrane. This containment design ensures that waste and wastewater (leachate) are contained and isolated from soil and groundwater.

Leachate Collection & Treatment

The leachate collection system at CSI currently includes five monitored collection sumps and removal pumps. Leachate is managed onsite and used as operational dust control on the lined portion of the landfill.

Groundwater Monitoring

Groundwater is currently monitored at four wells, which are downgradient of the waste disposal footprint. The groundwater monitoring network which is approved by the Colorado Department of Public Health and Environment is sampled and analyzed semi-annually in accordance with the procedures of the facility's groundwater sampling and analysis plan.

Security

Site security is ensured by controlled, limited access to the facility through the gatehouse as well as perimeter fencing and natural barriers. During non-business hours the gate is locked and monitored by 24-hour electronic surveillance.

CONSERVATION SERVICES, INC.

41800 E. 88th Ave.
Bennett, CO 80102

HOURS OF OPERATION

Monday – Friday: 7:00am – 5:00pm
Closed Saturday and Sunday and
Major Holidays

YEAR OPENED

1989

FACILITY ACREAGE

383 acres

PERMITTED FOOTPRINT

134 acres

REMAINING PERMITTED CAPACITY

9,178,000 tons

WASTE MANAGEMENT

Acceptable Material

Asbestos – Friable/Non-Friable

Auto Shredder Residue

CERCLA Wastes (non hazardous)

Construction & Demolition (C&D) Debris

Drum Management – Liquids/Solids

Exploration and Production (E&P) Waste

Non-hazardous Industrial & Special Wastes*

* e.g. any discarded material that, due to its physical or chemical characteristics, requires more stringent handling, documentation or other management than normal Municipal Solid Waste (MSW)

Unacceptable Material

Hazardous Waste

Licensed Radioactive Waste

Municipal Solid Waste (MSW)

PCBs equal to or > 50 ppm or otherwise prohibited under TSCA from Subtitle D landfill disposal

Putrescible Waste

Universal Waste

Waste Tires

Additional Services Provided

Bioremediation

Solidification

Risk Mitigation

Waste Management provides the highest level of services, backed with state-of-the-art site design and management systems, to minimize risks and reduce liabilities.

Community Partnerships and Involvement

CSI is proud to be an active supporter of community events and programs that make its surrounding cities a strong and healthy place to live, work and play.
