

Woodside Landfill

Woodside Landfill is a regional facility that provides safe and convenient disposal services for communities, businesses and industries serving Livingston Parish and surrounding cities. WM's approximately 300 disposal facilities employ the advances in landfill technology. This facility is engineered with environmental protection systems which are subject to highly regulated monitoring and reporting requirements. Systems include engineered liners and covers, leachate collection and removal, and landfill gas collection and control.

Containment Design

Woodside Landfill utilizes a Subtitle D liner system featuring three feet of re-compacted clay, overlain with a 60 mil High Density Polyethylene (HDPE) synthetic liner.

Leachate Collection & Treatment

At Woodside Landfill, leachate is managed using a drainage blanket with an automatic extraction system. Leachate is safely managed and transported offsite to a permitted facility for treatment and/or disposal.

Groundwater Monitoring

Groundwater is monitored at 34 wells, both upgradient and downgradient of the waste disposal footprint. The groundwater monitoring network is sampled and analyzed in accordance with applicable regulatory requirements.

Landfill Gas Management

Woodside Landfill uses an active landfill gas collection system that consists of over 164 active gas extraction wells and 3 automated flare system.

Security

Site security features include controlled, limited access to the facility and perimeter fencing. During nonbusiness hours the gate is locked and monitored by electronic surveillance.

WOODSIDE LANDFILL

29340 Woodside Drive
Walker, LA 70785
800.963.4776

HOURS OF OPERATION

Monday – Friday: 5:30am – 4:00pm
Saturday: 7:00am – 12:00pm
Sunday: Closed
Can operate 24/7 with facility pre-approval

YEAR OPENED

1987

FACILITY ACREAGE

527 acres

PERMITTED FOOTPRINT

207 acres

REMAINING PERMITTED CAPACITY

23 million cubic yards

TONS PROCESSED ANNUALLY

850,000 - 1,000,000 tons
