

Beneficial Reuse

A track record of innovation and expertise focused on coal combustion products generated from coal-fired electric power plants.

For electric power plant operators, capturing and finding beneficial reuse options for the byproducts of power generation is the right thing to do. Now, in more ways than ever, Waste Management is the right place to turn. We get it done efficiently, effectively and professionally.

EXPERTISE IN FLY ASH MARKETING:

- 20-year focus on markets and technologies relating to coal-combustion technologies
- Proven track record of unique marketing and recycling technologies
- A full-circle solution provider
- Expertise in matching generators of recyclable materials (CCPs) with purchasers in a global market
- Extensive range of global manufacturing contacts ensures the best price and optimal location for recyclables generated.

INNOVATIVE SOLUTIONS:

- CarbonBlocker™ – patented technology, designed for powdered activated carbon

RANGE OF SOLUTIONS:

- Gypsum containing products to wallboard/agricultural use
- Ash-to-cement/DOT cement substitute
- Development of new beneficial reuse options
