

Looking for One Source for Affordable Disposal Alternatives?

Think Green.®

Waste haulers seeking convenient, professionally operated and competitively priced disposal services will find an unmatched combination of service, rates and locations at the landfills of Waste Management. With more than 300 active disposal facilities, Waste Management has a landfill to meet virtually every hauler's needs.

For the independent hauler, Waste Management landfills offer a superior combination of benefits including:

- Locations convenient to virtually all communities in the United States and Canada
- Competitive tipping fees and contract terms
- Speedy processing and minimal turnaround times
- State-of-the-art designs and operating procedures that ensure long-term site integrity
- Accurate billing for accounting efficiency
- Indemnification coverage from the industry's largest company
- A team of experienced industry professionals ready to help solve your every disposal challenge

The leading solid waste services provider in North America, Waste Management operates a comprehensive network of disposal sites that provide short- and long-term solutions for haulers and their customers throughout the U.S. and Canada. Our disposal sites include:

SUBTITLE "C" LANDFILLS

Waste types accepted for treatment and disposal at subtitle "C" landfills: Solid, semi-solid and liquid hazardous waste, excluding confined gases, explosives, radioactive materials, biological warfare agents, infectious wastes and concentrated oxidizing or reducing agents.

Treatment and Disposal Methods:

- Chemical oxidation (cyanides & sulfides)
- Neutralization (acids)
- Stabilization (in organic metal waste streams)
- Drum management
- Secure landfill of bulk and containerized solids (RCRA, PCBs, Non-hazardous)
- Macroencapsulation (RCRA hazardous debris)
- Microencapsulation (RCRA hazardous debris)
- Biological treatment
- Solidification

Independent waste haulers will find the convenience, accessibility, capabilities and value they're looking for at the landfills of Waste Management.

SUBTITLE "D" LANDFILLS

Providing permanent disposal of non-hazardous municipal, commercial and industrial solid waste. These types of landfills accept food waste, paper products, cardboard, plastics, scrap metal, rock crushing, liquid waste, composting, bioremediation, non-hazardous sludge and all other non-hazardous materials.

C&D LANDFILLS

Facilities for the disposal of cured concrete, asphalt, sheet-rock, roofing materials, nails, bricks, carpet, glass, dirt, wood products and other non-food-related refuse associated with construction and demolition activities.

INERT LANDFILLS

Sites for the permanent disposal of earth and earth-like products including concrete, asphalt, trees and leaves.

ASBESTOS DISPOSAL

Facilities for the permanent disposal of asbestos and asbestos-containing products.

To determine the landfill site and selection of services that are best for you, contact your Waste Management Landfill and Industrial Services sales representative.
