

Deer Valley Landfill

Deer Valley Landfill is a construction and green waste facility that provides safe and convenient disposal services for communities, businesses and industries serving the Phoenix metro area and surrounding cities. This facility is engineered with environmental protection systems that meet or exceed rigorous government regulations and are subject to highly regulated monitoring and reporting requirements.

Security

Site security is ensured by controlled, limited access to the facility through the gatehouse as well as perimeter fencing. During business hours, all traffic is directed to a gatehouse occupied by trained personnel. During non-business hours the gate is locked and monitored by 24-hour electronic surveillance.

Approval Process

Waste Management has a defined waste screening protocol for each of its non-hazardous waste facilities, which protects employees and the environment. For industrial and special waste streams, the generator or agent must complete a waste profile for review by our technical staff. While waste profiles are not typically required for materials received at the Deer Valley Landfill, they can be completed online at WMSolutions.com.

Acceptable Material

- | | |
|--|------------|
| Construction & Demolition (C&D) Debris | Rubbish |
| Inert Materials | Yard Waste |
| Landscape Rubble | |

Unacceptable

- | | |
